TWO-FACTORY OPERATING MODEL

Two facilities.
One project conversation.

Product development and manufacturing are coordinated across the Benyuan group in Guangdong, China.

Guangzhou

Guangdong Changcheng Pharmaceutical Biotechnology Co., Ltd.

Product planning, formula development and customer coordination near Guangzhou Baiyun Airport.

Heyuan

Benyuan Big Health Technology Industry (Guangdong) Co., Ltd.

A larger manufacturing base with specialized production workshops and packaging routes.

57,000 m2
Heyuan industrial base

10,000+ m2
Workshop area

6
Specialized workshops

Technical support described in the company profile includes 25 pharmacy and food engineers, 10 dedicated R&D staff and six appointed specialists. Confirm project-specific technical support with the team.

START WITH THE FORMAT

Six ways to build a range.

Discuss formulation, serving, sensory experience and packaging before selecting a manufacturing route.

Gummies

Shape, flavor and texture

Capsules

Ingredient and fill systems

Softgels

Oil-based product formats

Powders

Mixes, sticks and sachets

Tablets

Solid-dose development

Liquids & drops

Measured liquid formats

Packaging images are AI-generated concepts. Browse the live catalog for current product references.

DOSAGE & PACKAGING

Compare representative ranges.

Final fill weight, mold, formula compatibility and packaging structure are reviewed for each project.

FORMAT	RANGE	PACKAGING
Bottles & liquids	10-1,000 mL	Glass, aluminum or PP bottles
Tablets	0.2-4 g / tablet	Bottles or blisters
Sachets & sticks	10-300 g	Flexible packs and single servings
Tea bags	2-30 g	Filter bags, boxes or jars
Gummies	2-4 g / piece	Bottles, jars or pouches
Capsules	0.2-1 g / capsule	Bottles or blisters
Pills & pastes	2-6 g / unit	Project-specific packaging
Liquid drops	10-120 mL	Dropper bottle formats

These are representative capability ranges from the company presentation, not finished-product specifications or a guarantee that every formula will fit every format.

PRODUCTION & BUYER REVIEW

Make the production route part of the brief.

Equipment, process controls and documentation are selected around the approved product specification.

01 / RAW MATERIALS

Define ingredient specifications and incoming review requirements.

02 / IN PROCESS

Coordinate manufacturing checks with the selected production route.

03 / FINISHED BATCH

Review products against agreed specifications and inspection requirements.

04 / DOCUMENTATION

Agree the records and documents required for the product and destination market.

PRODUCTION SYSTEMS

CIP cleaning | UHT sterilization | 2,000 kg homogenizing system
4,000 kg liquid storage | Multi-lane filling | Automated counting and labeling

OEM / ODM PROJECT DELIVERY

A practical path from brief to batch.

Agree the specification and review points before making production commitments.

01

BRIEF

Define your market.

Audience, product direction, destination country and commercial requirements.

02

FORMULATE

Review feasibility.

Ingredient system, serving requirements, product format and packaging.

03

SAMPLE

Make it tangible.

Agree sample scope and evaluate product, sensory and pack references.

04

PRODUCE

Build the approved batch.

Coordinate manufacturing, checks and finished-product review.

05

DELIVER

Prepare the shipment.

Confirm packing, project documents and delivery requirements.

YOUR SOURCING CHECKLIST

Prepare a brief that moves the project forward.

A clear starting point helps the team review formula, packaging and quotation requirements together.

01 **Company & contact**

Company name, business email, contact person and sales channel.

02 **Market & audience**

Destination country, intended consumers and positioning.

03 **Formula direction**

Preferred ingredients, serving requirements and any existing specification.

04 **Product & packaging**

Dosage form, fill quantity, units per pack and artwork direction.

05 **Quantity & timing**

Indicative first order, expected replenishment and target launch window.

06 **Documents & review**

Sampling criteria, testing needs and qualification documents to review.

Download the project worksheet or submit your shortlist at benyuandajiankang.com/resources/

LET'S BUILD WHAT COMES NEXT

Bring your product idea. Start a focused conversation.
